Help Kiwanis prevent Pediatric Trauma

What Types of events cause Pediatric Trauma?

- Motor vehicle crashes (#1 killer of children)
- Falls
- Bicycle-related incidents, with or without the interaction of motor vehicles
- Pedestrian struck by vehicle incidents
- Penetrating injuries
- Sports-related injuries
- Violence (gunshots, shotguns, stabs and fights)
- Child abuse/shaken baby syndrome/assault
- Fire/burn
- Snow vehicles, off road vehicles, animal drawn vehicles, water transport
- Drowning/submersion

What is the Impact in Ohio?

In Ohio 4 in 10 children are injured and require pediatric trauma services.
3 in 10 are injured in a car related accident. 2 in 10 children suffer abuse.

In 2005, Ohio's Children's Hospitals had over 178,000 children visit their emergency rooms and they had over 1.5 million outpatient visits.
